Vendors huddle over privacy

Text:
... display. To quell some of the consumer privacy concerns now tied to
e-commerce, a **group** of high-profile **vendors** gathered in New York
Wednesday to test a new browser standard designed to filter through Web
site privacy policies. Dubbed **P3P** , for the **Platform** for **Privacy
Preferences** , the new **standard** was developed as a **common** way to let
consumers browse Web sites without concerns over whether information is
being collected...

...information will be used. Microsoft used the event to debut its decision
to incorporate the **P3P** standard in its next version of Windows, due out
next year. Microsoft has code-named the new product "Whistler." The **P3P**
standard has been more than four years in the making and was spearheaded by
the...
... showed off technologies, including a privacy statement generator that
lets Web site operators churn out **P3P** -compliant privacy statements.
Microsoft also unveiled a **P3P** -enabled version of Explorer and a **P3P**
-readable version of its own corporate privacy statement. Microsoft has
been working closely with AT&T Labs and the W3C standards-setting body to
develop the technology. W3C's **P3P** work is aimed at giving **consumers
more** say in how their personal information is used, said Daniel Weitzner,
W3C's technology and domain leader, in Cambridge, Mass. "This is a
technical standard designed to give **users more** control over their
privacy and to make it easier to extend that kind of control to **users**
which will build **more** trust in e-commerce," Weitzner said. A W3C team
headed up by an executive at AT&T Labs developed **P3P** as a plain-vanilla
capability that sifts through XML tags tied to elements contained in...

...Cranor, of AT&T Labs-Research, in Basking Ridge, N.J., and chair of the
P3P Specification Group. The W3C intentionally made **P3P** a plain-vanilla
standard and asked vendors to develop specific products on their own. The
Wednesday session will give those companies a chance to check out each
other's **P3P** offerings and test interoperability. The ultimate goal is to
derive an easy way for consumers...

... investment companies will have to commit to in order to make their
corporate Web sites **P3P** compliant will be minimal. Other companies
attending the interoperability session include Citigroup, PrivacyBank, NCR,
NEC...
